Forecast for Thursday 28 Jul 2022

Weather: Cloudy skies during the early hours with a chance of an odd shower or two at first. Staying generally cloudy through the morning but dry in most areas. An isolated shower is possible during the afternoon but most of the area will remain dry. Possibly brightening up a little by the evening.

Chance of cloud-free hill tops above 600m: 80%.

Low cloud and visibility: Widespread cloud cover throughout the day but the bases will generally be well above the summits. Patches of cloud may briefly develop over the highest summits (>800m) during the afternoon. Generally good visibility but locally very poor in any cloud.

Forecast for Friday 29 Jul 2022

Weather: Cloud amounts reducing through the early hours and becoming largely clear by dawn with a chance of patchy mist and fog forming in some valleys. Mostly sunny during the first part of the morning and whilst some cloud will bubble up, it will stay mainly dry with sunny spells through the afternoon and into the evening.

Maximum wind: Southerly 5-10 mph increasingly to South-westerly 10-15 mph.

Chance of cloud-free hill tops 600m: 90%.

Low cloud and visibility: Fog may briefly lift to patchy cloud around 300-400m for a couple of hours after dawn before dispersing. Otherwise, any cloud bubbling up will be above the summits. Generally very good visibility, but locally very poor in valley fog first thing.

Temperature: **Valleys:** Plus 9 Celsius rising to plus 24 Celsius.
At 600m: Plus 12 Celsius rising to plus 17 Celsius.
Freezing level: Well above the summits.
